How many GEEKS Does it take to fix a computer?

Computer services we provide
• Computer / Laptop Repair
• Spyware & Virus Removal
• Custom Built Computers
• Tune-up's, Tweaks & Training
• Home Networking
• Media Center Integration

The one stop shop when it comes to computers in the Minneapolis / St. Paul Minnesota area! We are a team of 2 brothers who have been **building, tinkering, upgrading and repairing computers** for the past 15 years. We aren't fresh college grads wearing a white shirt with black slacks. Nope, we are just two guys who know their stuff, want to continue our passion and make computer services more efficient than those places that claim to be geeks! You'll find we keep it simple and avoid unnecessary lingo that confuses you. Ever notice in the service industry you don't get that personal touch because you get the attitude "I just work here"? We THRIVE on referrals, customer satisfaction and your return business.

Quick computer & laptop repair turnaround with these geeks!

That's right, it takes time for those large impersonal computer repair service departments to actually work on your computer or laptop. What if you needed your laptop for an important trip? We will service you within a timely fashion. Sure we can't quote you the time frame because we have no idea what you need done yet! Sometimes it's same day service, other times it could be 3-4 days before we get your computer back to you. If you have us stop in and perform on-site service then it will most likely be completed within a few reasonable hours. Not too shabby eh?

Surcharges, fees and other unnecessary charges! ARGH!

Do you remember the last time you were in a computer repair shop and you saw the list of charges on the bill and wondered why you didn't just buy a new one instead?

Everyone has. This is why we have a strong clientele that keeps coming back. We keep the charges simple, honest and reasonable. You will also find our fees are significantly less than the other guys in black, orange and white.

Why have you geeks fix my computer or laptop? My "so and so" can fix it for me.

Like we said before, we have been tinkering with these things for over 15 years! Shane Rooney is a Microsoft Certified Professional and Jesse Rooney has an educational background in computer programming & web development (see his website at <http://www.resomedia.com>). Want to see our credentials? [Click here!](#)

Yes, everybody and their brother knows someone who **CAN** do some fiddling with a computer - ever notice it is never done right? You'll waste more time and money in the long run by having an amateur do the work. If you still aren't sure - get it done by someone else and compare the final bill to our prices! We are positive you will get faster results, more education about your computer and a smaller fee.

Geeks that offer computer tips, tricks and education

If we are on-site fixing your computer, feel free to pick our brains. No question is a stupid question. We'll help you understand how things work, show you some tricks and teach you a bit about your computer in the process of fixing it. If you drop it off with us, we'll be more than happy to answer any questions you may have and help you on a path to efficient computing practice. Yes there is such a thing! We also offer specialized training with specific software products. Please see our [Tune-up's, Tweaks & Training](#) page.

Give us a call or send us an email, save yourself time and money!
